## PROFILE

Creative and driven web developer with strong technical skills in HTML, CSS, JavaScript, React, and Vite using API. I am passionate about building modern, responsive, and user-friendly websites, always aiming to blend functionality with clean, appealing design. I have completed formal training as a web developer and continuously work to improve my coding and front-end development skills.

In addition to development, I have a strong interest in graphic design and digital creation. I am good in Adobe Photoshop, Illustrator, and Adobe XD, with hands-on experience in logo design, visual identity, and image editing. These creative tools allow me to bring an artistic perspective into my web projects.

Although I don't have formal UX design experience yet, I am highly interested in the field and open to UX-related opportunities where I can learn and grow, especially at the intersection of design and development.

## Education

### Webudvikler

Medieskolerne, Viborg

2023 - Marts 2025

### It/Business

2015

- Basic C Programming
- Computer Science

## Personal Information

Married and mother of two young children. I moved to Denmark in 2018 and have worked hard to adapt to Danish society, both professionally and personally. My journey has taught me resilience, adaptability, and the value of continuous learning. I thrive in multicultural environments and bring a global perspective to my work. Balancing family life with education and career development has strengthened my time management, focus, and determination. I am driven by a deep passion for creativity, technology, and personal growth, and I value meaningful collaboration and inclusive work environments.
